

GREENSHIELD CONTROL MODULE

GREENSHIELD CONTROL

The Dravo Greenshield control panel is suitable for all makes of indirect gas and oil fired warm air heaters

Dravo also offer a complete range of indirect gas and oil fired warm air heaters. All backed by free surveys, design assistance, turnkey installation, commissioning, national 24 hour after sales service, and full maintenance.

- Installed on new projects or as a retrofit, the large energy savings quickly pay for the installation.
- Saving 15 - 25% of energy consumption, it's good for you and the environment.
- Inbuilt self learning software, automatically optimises burner firing, for maximum thermal transfer, hence efficiency.
- Lowered firing rates help reduce stratification, minimising wasted heat, adding to the savings
- No need to turn the thermostat down to save fuel, genuine savings without compromising comfort, so the workforce will be happy too.
- Comfort guaranteed - Under extreme conditions, the Greenshield will automatically override, to ensure that the thermostat can be satisfied.
