

ECONOMY 2000L

No of zones	1
7 day time-clock	•
Self learning optimiser	•
Manual summer fan	•
Frost protection	•
Security coding	•
Override facility	•
Constant fan facility	•
Back-lit display	•
Service warning	•
Built in sensor	•
Heater lockout & reset	•

**Optimisation**

The Economy 2000L offers optimisation. A system whereby the control automatically calculates the turn on time to ensure the building is up to temperature for the programmed switching time.

**Summer fan**

The Economy 2000L offers a summer fan facility. This is used to give ventilation during the summer months. A single key press enables the summer function.

**Constant fan facility**

Constant fan is used to control destratification fans. The output is active throughout the heating program setting.

**Security coding**

The Economy 2000L offers security coding to prevent unauthorised alteration of the system.

**Back light display**

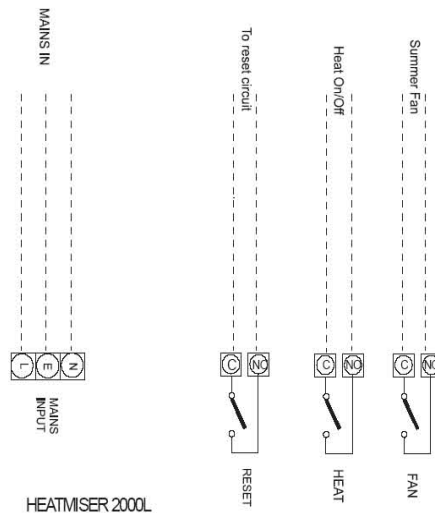

The display lights up when any key is pressed, this makes the display easy to read in poor lighting conditions.

**Built in sensor**

The Economy 2000L includes a built in sensor, reducing installation time.

**Heater lockout & Reset**

The Economy 2000L features heater lockout & reset for use on heaters with electronic ignition.
